Bangor, June 11, 1846.

The Sugar-Coated Pills.

NEW SARSAPARILLA PREPARA- TION.

To cure Diseases, Purify the Blood; To
avoid the effects of pure air.

That PREDISPOSITION which exposes the human
frame to the infection and violence of every
class of disorders, proceeds directly or in-
directly, from a morbid state of the
SYSTEM caused by

IMPERFECT BLOOD.

HALSEY'S SUGAR-COATED MAGIC LIFE
PILLS. The originator of the only true
and genuine Sugar-coated Pills, most respectfully
informs the enlightened public, that this new and
elegant preparation can be obtained only from ad-
mitted agents and at the proprietor's establishment
in New Haven, Conn. Price 25 cents a single
pill. 5 boxes \$1.00 per dollar for Bangor.

G. W. LADD Agent for Bangor.

Among the numerous remedies which stand re-
sponsible on the basis of an ancient name, are none
perhaps which have acquired so great celebrity,
and extensive use in so short a time as this invaluable
article. They have gained their high reputa-
tion, almost, by their good works. Those who once
try them, always use them again. They are grate-
ful to the stomach, they improve the functions of
secretion, and assimilation. They
refresh, invigilate, and create a natural warmth
throughout the whole system, giving it greater vitality and animation. The ex-
perience of thousands attest to their good effects.
After using them for a short time the hitherto
wretched invalid finds that all disagreeable and un-
heathy humors have forsaken his system. His
digestive organs perform their proper functions, his
blood regains its wonted purity, the oppressive
sense of weakness and pain departs, and his body

In BILIUS complaints, Costiveness, Indiges-
tion, Dyspepsia, and all other disorders of the stomach
which produce the most unhappy results. For
Sore, Ulcers, & Rheumatism, Tetters, Epilepsy, Erys-
ipelas, & Skin Complaints, Consumption, & other
maladies, which are the result of various diseases, and
other like diseases arising from IMPURE BLOOD.

Such are the results produced by Halsey's
Sugar-coated Pills, the mildest, yet most
effective preparation of the like in use.

Premiums awarded at the FRANKLIN INSTITUTE.

Sold wholesale and retail by JULES HAUEL, Pe-
tifer and Chemist, No 16 South Third street, Phil-
adelph. & ALDEN, Druggists, G. W. LADD, G. F. SARKEY,
Fancy Goods dealer, 34 Broad-street, Bangor.

To the Public.

Give My Articles a fair trial and judge for yourself.

I WARRANT them to be represented, or the mon-
ey refunded.

MY EUAU LUSTRAL HAIR RE- STORATIVE.

This universally popular and admired article, for
from adjacent properties, contains all other de-
structive materials, cleanse the hair expeditiously, and
render it beautifully long, and impervious to it that hea-
vily it is exposed to the sun. This Euau Lustral
has become exceedingly popular, and is now in great
request, and will positively bring in new hair. Hair on
Bald Heads by use, and hair that has been made
grey, and is growing grey, falling out, by the use of
this restorative, will grow out, and will soon be restored
to its natural color and brilliancy, by a few ap-
plications of the Euau Lustral.

It is a preservative against Baldness, and an infall-
able remedy against the affection of the Skin of the Head,
as it is not liable to the effects of the Sun, and
therefore does not injure the skin.

It is the simple product and immediate extract of
some plants singular for the hair, endowed with prop-
erties of highly cleansing and restorative power,
and which are the result of the researches of the
proprietor of the Euau Lustral.

It is a powerful restorative, and will restore the hair to
its original color and brilliancy.

It is a powerful restorative, and will restore the hair to

Wig and Courier.

John S. Hayward,--Editor.

SATURDAY, JANUARY 9, 1847.

City Prospects.

We understand that several beautiful private residences are to be erected in our city next season—We have seen the plans of some of them and we assure our friends that when completed they will be highly ornamental to the city and serve very much to relieve the city from anything like a monotonous appearance.

The buildings erected the last season were generally in good taste and some of them quite gaudy in their way, but the style for the next season will surpass in richness and beauty any thing we have heretofore had. The suburban cottage style will be brought out in some of their beautiful varieties. This style when suitably followed with shrubbery and vines, upon some of our hill sides, will become very popular.

There is some talk about erecting another meeting house here next season for the accomodation of the third Congregational parish. The increase in our population, particularly in children renders it absolutely necessary that at least two double school houses be erected next season. Our schools are now crowded almost to suffocation and the consequence is that several private schools have been started.

Most kinds of manufacturing business commenced here, prosper very well, and there are yet many kinds of manufactures which could be carried on here to advantage, particularly manufac-tures in wood. Whoever gets in a new branch of useful labor which will give profitable employment to a few men or only one man confers an advantage upon the city. A few years since, most of the Rules for Surveyors, mechanics, and others were brought here from abroad. Mr. Asa H. Norton engaged in the business and it now takes all his time to supply the market. The accuracy and beauty of his rules have brought them into general use from the Kennebec to St. John. If people will but look about them they may find many other branches of labor opening before them, and in which they engage without the investment of much capital.

The conviction seems to be settling itself in the public mind that Maine must become great manufacturing State. The natural advantages for this are too great to be neglected. With this conviction will come more and more of effort to introduce manufactures. Capital invested in this business has been well paid while labor has met with a generous reward. The union of these for useful purposes has been mutually beneficial. Our citizens have been and are deeply and almost exclusively engrossed in the manufacture of lumber, but as they become better able they manifest a willingness to engage in some other branches. The effort to erect a dam at Treat's Falls is one evidence of this. We think that dam will be built and that the immense power of our river at that place will be employed in driving machinery of various factories.

We have been permitted to read a letter received in this city yesterday from an officer in the U. S. Army now in Mexico dated at Monclova Nov 29 1846.

Church & Legion is composed of Washington's Flying Artillery, Squadron 1st Dragoons, Squadron 2nd Dragoons, Battalion 6th U. S. Infantry, one company Kentucky Volunteers, one company of Texan Riflemen.

This Legion is under command of Col. Churchill Major Thoms is one of this city's Quartermaster and our gallant fellow citizen Lieut James H. Carlton is appointed Assistant Adjutant General Lieut Gen F Evans, son of our Senator in this legion, in the first Dragoon.

At the above date they had green peas and green corn, pumpkins, beans, &c oranges upon the trees, the Mercury at 84 and the weather generally like June in Maine.

While the Haranna correspondent of the New Orleans Picayune states that information has been received from Mexico that the Mexican Government had sold or delivered over to a Frenchman by the name of Ribaud, well known in New Orleans, the two Mexican men of war at Alvarado, called the Santa Anna and Mexicano, and that Ribaud had left Mexico, intending to endeavor to get these vessels at sea under the French flag, take them round Cape Horn, and cruise against our commerce in the Pacific and East Indies. It is said that Ribaud holds commission as Captain in the Mexican Navy, yet it is not probable he will be able to accomplish his purpose.

WGeo Leslie Combe has lately received a letter announcing that the friend O'Blennion, who resided here two years ago, has at length met his death, having been shot by some Mexicans at Matamoras, where he had settled himself as a trader. Just before his death, he had murdered a gentleman by the name of Townsend, who had a claim against him.

LLiet Wilkes has written a pamphlet in favor of a Rail Road to the Pacific—the magnetic telegraph to be built simultaneously with it. What a glorious idea this is of connecting the Atlantic and Pacific by steam and lightning communication! It is feasible too, and must be done. The indomitable Yankee Nation has decided it, and all the barriers of prairie and of mountain must yield before its prowess.

Rev Dr. Cogswell, of Gilmanstown, N. H., has been appointed editor of the New England Historical and Genealogical Register, which is to be published by the New England Historical and Genealogical Society of Boston.

The 6th of a series of Lectures will be delivered in the Universal Chapel, on Sunday evening, at 7 o'clock.

Subject, 2d Peter, 2. 4 "For if God spared not the angels that sinned, but cast them down to hell."

The Bath Tribune states that a store was burnt at Topsham, Tuesday night. The store belonged to Alfred White and was occupied by Mr. Hubbard as a tin ware store. Goods were saved.

The people of Bath are wide awake on the subject of their Rail Road. They are determined it shall go, for if it don't they'll make it.

Temperance Meeting this evening—Proceedings of the Courts.

M E S S A G E From the President.

To the Senate and House of Representatives of the United States.

In order to prosecute the war with Mexico with vigor and success it is necessary that authority should promptly be given by Congress to increase the regular army, and to remedy existing defects in its organization. With this view your favorable consideration is invited to the annexed report of the Secretary of War, which accompanied my message of the 8th inst., in which he recommends that ten additional regiments shall be raised to serve during the war.

Of the additional requirements of volunteers which have been called for from the several States, some have been promptly raised, but this has not been the case in regard to all. The existing laws require that they should be organized by the independent action of the State Governments, has, in some instances, occasioned considerable delay, and it is yet uncertain when the troops required will be ready for service in the field.

It is our settled policy to maintain in time of peace as small a regular army as the exigencies of the public will permit. In a state of war, notwithstanding the great advantages with which our volunteer citizen soldiers can be brought into the field, the small Regular Army must be increased in its numbers, in order to render the whole force more efficient. Additional officers, as well as men, are become indispensable.

Under the circumstances a peculiar propriety exists of increasing the officers, especially in the higher grades. The number of such officers who from age and other circumstances have been and are rendered incapable of active service in the field, has seriously impaired the efficiency of the Army.

From a report of the Secretary of War, it appears that about two thirds of the whole number of regimental field officers are either permanently disabled or necessarily detached from their commands on other duties. The long engagement of peace has prevented us from experiencing much embarrassment from this cause, but now in a state of war conducted in a foreign country it has produced serious injury to the public service.

An efficient organization of the Army, composed of regulars and volunteers, while prosecuting the war in Mexico, it is believed would require the appointment of a General Officer, to take the command of all our military forces in the field.

Upon the conclusion of the war, the services of such an officer would no longer be necessary, and should be dispensed with upon the reduction of the Army to a peace establishment.

I recommend that provisions be made by law for the appointment of such a General officer to serve during the war.

It is respectfully recommended that early action should be had by Congress, upon the suggestions submitted for their consideration, as necessary to secure active and efficient service in prosecuting the war, before the present favorable season for military operations, in the enemy's country, shall have passed away.

JAMES K. POLK

Washington, Dec 29, 1846.

Ice Mountain in Oregon.

Father Dr. Smet, one of those self denying pioneer missionaries of the cross, who has spent and is spending a portion of his life in doing good among the scattered people of Oregon, has written a series of interesting letters from that wild region to the Freeman's Journal. He thus speaks of the valley de la Fourche du Trou Beaus —

As we approached the highlands, the snow became much deeper. On the 1st of May, we reached the great Butte, which has all the appearance of a lake it is drained of its water. Here we pitched our tents to await the arrival of the people of Cahuapa, who always pass by the route on their way to Canada and the Factory. Not far from the place of our encampment, we found a new object of surprise and admiration, a immense mountain, of pure ice, 1500 feet high, enclosed between two enormous rocks. So great is the transparency of this beautiful ice, that we can easily distinguish objects in it to the depth of more than six feet. One would say by its appearance, that in some sudden and extraordinary swell of the river immense icebergs had been forced between these rocks, and had there piled themselves one another, so as to form this magnificent glacier. What gives some color of probability to this conjecture is, that on the outer side of the glacier there is a large lake of considerable elevation. From the base of this gigantic iceberg, the river Trou takes its rise.

The Government of Canada has determined to institute an inquiry into the cruelty practised in the Penitentiaries.

The Nestorian Massacre.

Perhaps no circumstance since the Bartholo-mew massacre, in France, or the persecutions for conscience sake in England, has elicited such a commanding feeling of commiseration and indignation as the late massacre of Nestorian Christians. For that community, whose anti-christian efforts from us a generation ago akin to that we pay the remnant of the old allies of this country had a deep and abiding interest.

Since the visit of the worthy Nestorian bishop Mar Yohannan, in company with Mr. Perkins, a few years ago, great interest has been felt and expressed for that worthy people. Turkey is peopled with a military chieftain who numbers not a force that a government cannot in the least restrain or check his marauding and bloody career. Bedr Kahr, Bey, with his 40,000 Turks in four parties, ransacked the country of the peaceful Nestorians, in October, last, and had been for some time absent from his worship. He presumed there was sickness or trouble in their household, and would appoint a prayer meeting at his house on the next Tuesday afternoon.

The old gentleman, on one occasion, also caught the wanderers by the following piece of guile:

On one Sabbath afternoon, he told his people that he should take a short journey the next day, and be absent for a short time, but he would take care that some person should come from Boston and supply his desk the next Sabbath.

On the next Sabbath morning the meeting house was filled. The whole town turned out to see the Boston minister. They waited awhile in eager expectation of his entrance, when in marched the Rev. Mr. S. —, and walked up the broad aisle, as he had been accustomed to do many years gone by. On ascending his pulpit, he smiled graciously upon his large audience, and said —

"I am glad my dear hearers, that I have got you out, you are all here as you ought to be, and I hope your minds are prepared to receive instruction. I came from Boston, yesterday, to Constantinople, instead of Nestorion, Turkish friends enough to make a pyramid. What shall be done with such a herd?" Turkey, of which country he is a subject, is afraid of him.

Peru, well disposed to the Nestorians, is unable to avenge their God involving slaughter. If there never was before a justification for a crusade of nations here is one. The outcry is one that calls for aid. That act of the bloody Turk is one that would warrant as a righteous act the union of all Christendom to avenge them, and since Turkey is unable to avenge their rebellious subjects, she may yet learn that the cry of violated humanity may transfer that right to inflict punishment into hands able to do it.

Geo Leslie Combe has lately received a letter announcing that the friend O'Blennion, who resided here two years ago, has at length met his death, having been shot by some Mexicans at Matamoras, where he had settled himself as a trader. Just before his death, he had murdered a gentleman by the name of Townsend, who had a claim against him.

Liet Wilkes has written a pamphlet in favor of a Rail Road to the Pacific—the magnetic telegraph to be built simultaneously with it.

What a glorious idea this is of connecting the Atlantic and Pacific by steam and lightning communication! It is feasible too, and must be done. The indomitable Yankee Nation has decided it, and all the barriers of prairie and of mountain must yield before its prowess.

Rev Dr. Cogswell, of Gilmanstown, N. H., has been appointed editor of the New England Historical and Genealogical Register, which is to be published by the New England Historical and Genealogical Society of Boston.

The 6th of a series of Lectures will be delivered in the Universal Chapel, on Sunday evening, at 7 o'clock.

Subject, 2d Peter, 2. 4 "For if God spared not the angels that sinned, but cast them down to hell."

The Bath Tribune states that a store was burnt at Topsham, Tuesday night. The store belonged to Alfred White and was occupied by Mr. Hubbard as a tin ware store. Goods were saved.

The people of Bath are wide awake on the subject of their Rail Road. They are determined it shall go, for if it don't they'll make it.

You lost two legs in the army, you say;

What branch of education do you have, abetly in your school?

A willow branch, sir, the master has used up almost a whole willow tree.

The Guard and the Palm Tree.

A guard wound itself around a lofty palm, and in a few weeks climbed to its very top.

"How old mayst thou be?" asked the new comer.

"About a hundred years," was the answer.

"A hundred years! and so taller!" Only look,

I have grown as tall as you in fewer days than you can count years."

"I know that well," replied the palm. "Every summer of my life a guard has climbed up round me, as proud as thou art, and as short liv-

ed as thou will be."

Two or three guards met, one of them was ex-
ceedingly rich the other in moderate circum-
stances. The latter began to congratulate the
former on his large possessions, and the high-
ness he must enjoy, and ended it with contrast-
ing it with his own condition.

"My friend, said the rich man, 'will you al-
low me to ask one question?'

"Certainly, sir."

"Will you be willing to take my property
and take the whole care of it for your board-
ing and clothing?"

"No, indeed."

"Well, that's all I get."

"Susan, stand up and let the gentleman see
what you have learned. What does he say?"

"I don't know, m'm."

"Why you ignorant critter! What do you ol-
ways sit on?"

"Oh, m'm, I don't like to tell."

"What on earth is the matter with the gal? Tell
me what it is."

"I don't like to tell—it is Bill Cross' knee—but
he never kissed me but twice."

"Arthropus and Apple sauce!" exclaimed the
school mistress, and she fainted!

[From the Boston Traveller.]

Sweet Sister, Come.

Ob! thought all sweet and sad

The heart shall fail,—

Vision of beauty glide—

Love thrill thy soul—

Will ye not come?

The light of day grows dim,—

It fades away—

Night fits her vap'rous hymn,

Oh! join the lay!

Sweet sister, come!

Come to the place of prayer,

Communion sweet,

Ob! bring ye ever there

An offering meet,

Will ye not come?

Light to your path shall spring,

Gilding the way,

Hope plies her heavenly wing,

While ye shall pray,

Dear sister, come!

[NOTICE.]

The annual meeting of the BANGOR FEMALE CHARITABLE SOCIETY, will be held at the Home of Mrs. Anna Farris, on High-street, on Tuesday the 13th instant, at 2 o'clock, P. M.—L. W. SAYLOR, Secy.

CONSUMPTION CURED!

BUCHAN'S HUNGARIAN BALSAM OF LIFE.

THE GREAT ENGLISH REMEDY

For Colds, Coughs, Asthma,
and other Diseases of the
CHEST and LUNGS.

BUCHAN'S HUNGARIAN BALSAM., The Great English Remedy for Pectoral and Pulmonary Diseases, still stands unrivaled and unsurpassed as the most able, best, agreeable, and effectual curative of the formulable complaints, now known throughout the civilized world.

Three years of trial in the United States, during which time it has exclusively distributed from Maine to Florida, has only served to establish its pre-eminent merit in all parts of the country, as the great and ONLY REMEDY.

In the west of England, in Scotland, and the best and most forcible curative of all the eight forms of colds, rough and inflammation, that can possibly be used.

SPOTTING OF BLOOD. The frightful symptom of approaching Consumption, or Consumption itself, manifested by the use of Buchan's Hungarian Balsam, which heals the affected membrane, removes the incipient tubercles, and restores every vital organ, the lungs, to sound and healthy condition.

REMEMBER H. H. H. Still the best Remedy for Consumption, and the best Remedy for Consumption, and it does not check the patient, whether or later determine in death. A person who takes blood again, with no blood again, unless a proper curative is immediately employed.

PAIN IN THE SIDE. This dear, tragic symptom of Consumption arises from an inflammation of the Lungs, or the Membrane extending the Pleura, or from Bronchial affection of the air passages. In her case it is a very dangerous indication of disease. It prevails first, and is followed by a violent cough, and then the symptoms of the disease. In case of Consumption, it will be removed at once, and nothing can possibly hurt the object so deeply and deeply as the Great English Remedy, discovered by Dr. Buchan, which is not only sovereign in its ingredients, and perfectly harmless in all its operations.

LIVER COMPLAINT. In cases of Consumption, the Liver is always one of the first affected, and also the Epileps, Rheum, & all the other diseases. On detecting Consumption, patients, in most cases, feel the indigestion, flatulence, constipation, &c., & then follow the following disease, in the course of which it becomesatty, oily and excreted. The effect of the Hungarian Balsam in the cure of the Liver, especially if it be of an ulcerous nature, is direct and powerful. Simple disease of the Liver, unattended by Consumption, is easily cured.

HISTERIC COUGH. The harsh, dry, hacking cough which affects all people, and prevails in a large state of health is happily affected by the Hungarian Balsam.

It charms, soothes, and stimulates the whole breathing apparatus, removes all mild, chronic, and other foulness, purifies and animates the blood, imparts the corrective power of the Liver, spleen, & other large glands, and the digestive organs, and imparts new life to the system.

BRONCHITIS. Bronchitis, & dysentery of Breathing, Harsh Cough, & violent expectoration, with all other symptoms caused by a violation of the air, not to mention the effects of consumption to the lungs, are directly and specifically cured by the use of the Balsam, as results invented by Dr. Buchan.

This very painful, wearisome and injurious complaint, and always has a powerful tendency to invade and soften the Lungs, and thereby to induce the worst form of Pulmonary Disease. It is warned in time, ye afflicted! and employ this valuable remedy.

COLICURES ON THE LUNGS. The Hungarian Balsam is the only sovereign remedy which has any power to dissolve, remove, and cure Tuberculosis on the Lungs. Incurable, as this is generally esteemed, we have the most abundant and conclusive evidence to sustain the assertion that such is its direct and immediate effect in all cases where there is no natural organic defect in said. So confident is the American Agent of its power to cure the worst form of this disease, that he prefers (as he has frequently stated) that it should be used by invalids who have been PROFOUNDLY INCURABLE by the most eminent physicians, rather than by persons affected with Consumption, as it is believed that its triumphs might be more glorious. His bold declaration that it will cure Interstitial disease, and completely annihilate it in the course of a few days.

EXPECTORATION. Free expectoration is the most important object to be attained in all attempts to cure diseases of the Chest and Lungs. The Cough, which is so distressing, is simply the result of a desire to expectorate, and as long as foul matter exists in the air passage, it will continue to do so, the body will not provoke a cough. Coughing is an attempt to throw off its matter, and expectoration is a great relief. Inability to expectorate in the latter stages of Consumption is the cause of death.

The Hungarian Balsam is a great Expectorant—it gives the most moist and dive matter in the air passage, changes it from a thick, glutinous substance, to a thin & dry & fine, and throws it off with the greatest possible ease and comfort to the patient.

There is no better remedy in the world, if it were to be considered.

SPOTS AND ASTHMA. Simple, & spasmodic Asthma, has no better remedy. The Hungarian Balsam, The painful and destructive affection which resists almost every thing else, yields to the all powerful influence of this great remedy, as readily as any other form of Pectoral disease.

CONSUMPTION. Consumption has been graphically described as "Shutting of one's self." The Hungarian Balsam by its effects, warming, softening, and animating power, produces, not abrading but expansive.

Before its delightful influence all chills, fever, and inflammation, blisters, & blisters, & a hot flushed skin, an uncertain strength, emaciation, and decline—spare, like the pneumonia does of night before the glorious morning sun! This is no delusion, but demonstrable fact, sustained by incontestable proofs from all parts of the country.

Sold in bottles, study one dollar per bottle. By Special Appointment, Dr. Bradlee, Boston Mass. Sole Agent for the United States and British American Provinces.

J. S. HOLLIFFON. 120 Washington street, Boston, General Agent for the New England States.

AGENTS: Bangor, D. BUODE, G. W. LADD, Bremen, L. SMITH, Frankfort, Dr. N. GILMAN, Bucksport, Bangor & Houlton, Wiscasset & Jordan, Thomaston, T. F. COOPER, Thornton, Allendale, Wiscasset, W. H. Hallowell, and the dealers in Medicine generally.

June 15.

PAPER, PAPER, D. BURLING SLIP, NEW YORK.

THE GRAEFENBERG PILLS.
THERE ARE THE MOST CONCLUSIVE REASONS why that class of Medicines denominated "PATENT," would be made the means of individual and enduring health, and the best family Physician, in his high office of medical science, could not, in his own observations, bring to bear upon the inventors and manufacturer of a Pill. Why may not this long devotion to the direction of medical science be crowded into the brief space of a Pill? There is no reason, and it is the simplest dictate of the simplest common sense to say that I shall thus produce with a perfect article as can be produced, and that it will be of service to any one who has to do with any malady in the mystery over.

This labor has been bestowed upon the

Greatenbergs Vegetable Pills

and they are presented to the public in the same unparalled in the whole history of medicine, but see.

It will be seen in citing the history of all great inven-

tions, that they were not made or invented until

the arrival of what may be termed the FULLNESS OF TIME, or the fullness of the times, for instance, was not

until the fullness of time that the invention of the

steam engine was invented, and when

MERCURY was first invented to man, in the

whole world, and when the invention of the

steam engine was first invented to man, in the

whole world, and when the invention of the

steam engine was first invented to man, in the
